Tried and tested filter system, excellent performance!

Who we are

INFOLABEL AG is the Swiss manufacturer of the tried and tested **Chemap®-Filter-Systems** and a long standing source of know how concerning the so called **Funda Filter Technology**. We offer you a comprehensive service from formation to the launch and upkeep of your individual filter system. With the pressure plate filter you can solve filtration problems in an easy and economical way. Filter equipment from INFOLABEL AG is particularly suitable for demanding filtrations, in which drying, extraction, residual volume filtration, washing and sterile processing procedures are elements of the filtration. Our filter systems are used in the environmental protection, food, pharmaceutical, chemical, nuclear and hydrometallurgy sectors.

Our specialists in technology, construction and process engineering design and construct new filtration equipment on the basis of years of experience and profound process know how. The filtration equipment has standard components in accordance with the successful **Chemap®-Filter principle**, and is naturally adapted to your specific needs.

INFOLABEL AG is your point of contact for all questions and solutions to problems concerning process filter systems!

Core Competencies

- **Chemap®-Filter systems**
- **Funda filter technology**
- **Extension of filtration area**
- **Technology, construction and process engineering**
- **Spare parts**
- **Test equipment**
- **Enlargement filtration area**
