

Tried and tested filter system, excellent performance!

Who we are

Chemap AG is the Swiss manufacturer of the tried and tested Chemap[®]-Filter Systems and a long-standing source of know how concerning the so called Funda Filter Technology. We offer you a comprehensive service from training to the launch and upkeep of your individual filter system. With the pressure plate filter, you can solve filtration problems in an easy and economical way. Filter equipment from Chemap AG is particularly suitable for demanding filtrations, in which drying, extraction, residual volume filtration, washing and sterile processing procedures are elements of the filtration. Our filter systems are used in the environmental protection, food, pharmaceutical, chemical, nuclear power and hydrometallurgy sectors. Our experts in technology, construction, and process engineering design and develop cutting-edge filtration equipment, leveraging years of experience and profound process know-how. The filtration equipment has standard components in accordance with the successful Chemap[®]-Filter principle and is naturally adapted to your specific needs. Chemap AG is your point of contact for all questions and solutions to problems concerning process filter systems!
